PEAK Mobile Patcher

PMP-1

Patching Correctly...

PEAK Asphalt™ a high performance 30 year asphalt pavement is the key to the **PEAK Mobile Patcher™-1**'s success.

To get the best patches you have to do **patching correctly:**

- the best patches are made with PEAK Asphalt™ Mix.
- the best patches are applied hot.
- the best patches are hot bonded to the existing asphalt.
- the best patches are compacted.

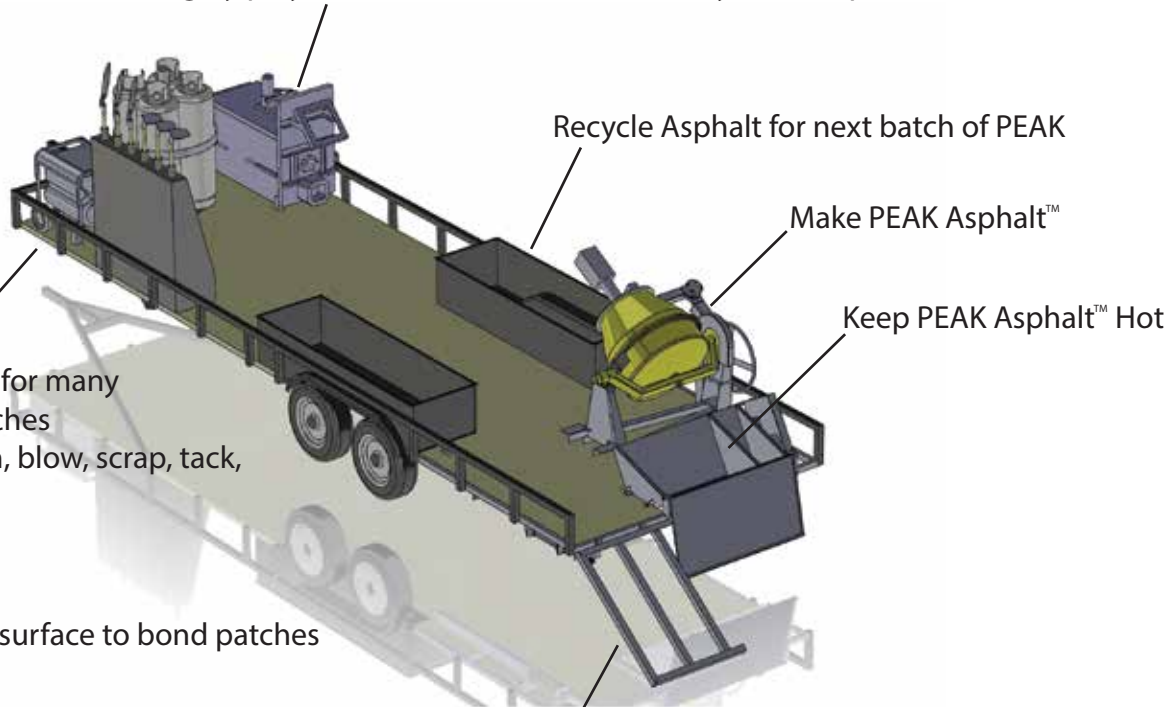

Make asphalt patching material that is much better than the asphalt in the road you are patching.

PEAK Asphalt™ patches outlast the original road in many cases.

PEAK Mobile Patcher™

PMP - 1

Make highly polymerized PEAK oil binder for very durable patches.

Recycle Asphalt for next batch of PEAK

Make PEAK Asphalt™

Keep PEAK Asphalt™ Hot

Electric tools for many different patches (sweep, clean, blow, scrap, tack, patch, seal)

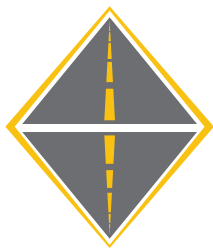

Heat asphalt surface to bond patches

Quick, easy access to many needed tools

Compactor
Easy access to use and transport
